

Digital Library Record - II

| Explanation & Understanding of Operators

To show existing table we created in previous unit from a database use the following command:

```
USE LibraryReport;  
SELECT*FROM Book1;
```

Output

Now we will see some examples of all 4 operators.

NOTE: Add these examples in line number 3 after adding above 2 lines of codes. After gaining output from every example, remove line number 3 & add new example line at number 3 again & gain output.

AND Operator Example

```
SELECT*FROM Book1 WHERE Author='Charles Dickens' AND Title='Oliver Twist';
```

Output

OR Operator Example

```
SELECT*FROM Book1 WHERE Author='Charles Dickens' OR Title='Malgudi Days';
```

Output

IN Operator Example

```
SELECT*FROM Book1 WHERE Book_ID IN ('201', '205');
```

Output

NOT IN Operator Example

```
SELECT*FROM Book1 WHERE Book_ID NOT IN ('201', '205');
```

Output
